DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Friday, 14 January 2022 at 05:30 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels are generally expected to be Low today. However, areas of Moderate to High pollution are possible near urban areas and busy roads in the south of the UK, in particular London. This is due to light winds allowing the build-up of locally emitted pollutants.

Tomorrow: On Saturday air pollution levels are forecast to widely become Low again as slightly increased wind speeds allow pollutants to disperse.

Outlook: Predominantly Low levels of air pollution are expected through the outlook period.
